

## **Brownfields 2017 Cleanup Grant Fact Sheet**

### **Bath, WV**

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Cleanup Grant**

*\$100,000 for hazardous substances*

EPA has selected the Town of Bath for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Railroad Depot Complex at 107 Williams Street and Route 552 in Berkeley Springs. The cleanup will focus on the 0.4-acre CSX site (Lot 3) within the complex, which was formerly used as a railroad yard and is contaminated with polycyclic aromatic hydrocarbons and arsenic. Grant funds also will be used to conduct community involvement and redevelopment planning activities.
